<b>Name</b>	Section C - Recommendations
<b>Description</b>	Recommendations were provided by: members of the shoreline inventory field team based on their shoreline activity in summer 2011, members of the Lake Winnipeg Foundation board, and members of the Science Advisory Committee to the Lake Winnipeg Foundation. The summer 2011 SHIM project is the start of an ongoing shoreline inventory, and these recommendations are offered as insights from the first demonstration project. They are not intended to be a complete set of recommendations for the south basin shoreline. Certain recommendations pertain to more than one category or type of recommendation, so their placement is discretionary. Categories and recommendations were reviewed using frequency analysis.
