Dataset Name	KuKa Rothera 2023 Processed Waveforms
Dataset General Type	Polarimetric, Nadir-looking Ku/Ka-band Waveforms
Dataset Type	Dataset
Dataset Level	0
Program Website	https://defiant.ac.uk/
Keyword Vocabulary	Polar Data Catalogue
Keyword Vocabulary URL	https://www.polardata.ca/pdcinput/public/keywordlibrary
Theme	
Title	Cryosphere
URL	https://canwin-datahub.ad.umanitoba.ca/data/fr/group/cryosphere
Dataset Status	In Progress
Maintenance and Update Frequency	Not planned
Dataset Last Revision Date	2024-11-28
Dataset DOI	10.34992/pqvf-q516
Metadata Creation Date	2025
Publisher	CanWIN

Method Summary

This directory contains processed waveform data from the KuKa radar instrument from its deployment at Rothera Research Station during 2023. Data were collected over sea ice, open water, glacial ice and terrestrial snow. In addition, calibration experiments were performed on a metal sheet and over concrete inside the aircraft hanger. The data are therefore extremely diverse and contact should be made with the Rothera DEFIANT project team prior to any scientific analysis. Any such analysis will require auxiliary data concerning the nature of the target in the footprint (sea ice, land-ice, snow etc). Data are processed at full bandwidth (see Willatt et al., 2023 GRL for details on this) using the KuKaPy Python package (<https://doi.org/10.5281/zenodo.7967057>).

Comments

All data are geolocated with the exception of calibration measurements that occurred in the aircraft hangar where no GPS fix was available. Due to a persistent issue with the instrument clocks, the accuracy of timestamps are not always guaranteed.
